💼 PROFESSIONAL EXPERIENCE

2021 September – present
Remote, Greece

Interworks.cloud, Senior Software Engineer ⧉
I contribute to products related to Advanced Cloud Automation for major vendors such as Microsoft, Adobe, and Acronis. My primary focus includes developing Storefronts and CMS. I have led the establishment of infrastructures for Front-end Projects, executed proofs of concept for new products, implemented testing infrastructures, and created an internal component library. Additionally, I played a key role in the company's transition from Vue2 to Vue3. I actively participate in code reviews and provide mentorship to junior team members.

Using: **.Net Core, VueJs, Pinia, Kendo, C#, TypeScript, JavaScript, SCSS, Bootstrap, Storybook, Jest, Vue CLI, Vite, SQL.**

2021 April – 2021 September
Athens, Greece

SoftOne, Software Engineer ⧉
I played a pivotal role in launching new cloud products, including Shopify and WeTransfer Clones for our Business Partners. Additionally, I established the infrastructure for the main UI project, contributing to the company's innovative ventures.

Used: **.Net Core, VueJs, VueX, C#, Typescript, DevExpress, Azure Cloud, Azure Data Lake, Azure Cosmos DB**

2020 May – 2021 April
Remote, Greece

Threenitas, Software Engineer ⧉
*Contributed to diverse company products focused on crafting Loyalty Applications enriched with mini-games and rewards. Worked with notable clients such as **Cosmote**, **Heron**, and **Ritmeester**, enhancing customer engagement and satisfaction.*

Used: **.Net Framework, C#, JavaScript, JQuery, Bootstrap, Umbraco CMS**

📁 PROJECTS

Tha-Ships, Ship tracking application
Ship tracking app with real-time updates. The app features advanced sorting and filtering options and offers users a choice between a visually stunning 'fancy mode' and a streamlined 'simple mode.
Created with: **VueJs, Typescript, Pinia, Bootstrap, SCSS, Mapboxgl, restcountries, axios**

Homelike-GitIs, showing GitHub issues from the React Repo
Developed a practical GitHub issue showcase using React, featuring a convenient filter for sorting issues by status. This efficient issue management tool also incorporates infinite scroll for seamless pagination, ensuring a smooth user experience.
Created with: **React, Typescript, Redux, GraphQL, Bootstrap, SCSS**

Mini Opply, A small Vue application for showing a list of Ingredients and their Sellers.
An application that displays a list of Ingredients and their Sellers. Implemented robust Authorization logic along with infinite scrolling pagination to ensure a practical and functional user experience.
Created with: **VueJs, Typescript, Pinia, Bootstrap, SCSS**

Avium, Onion Ring architecture
Explored the dynamics of a Single Page Application (SPA) harmonizing with a Backend for Frontend (BFF), wrapped in an Onion Ring Architecture.

Created with: .**Net Core 8, VueJs, C#**

TransferIt, WeTransfer Clone ⊡
Developed a WeTransfer Clone solo using Microsoft Cloud technologies tailored for SoftOne customers.
Created with: .**Net Core 6, C#, VueJs, VueX, Microsoft Data Lake.**

Chatius, Side-project ⊡
A hands-on experimentation with cutting-edge features and architectures. Picture a chat experience blending Facebook and LinkedIn, end-to-end, employing **BFF** and **SPA** architecture. **SignalR** library adds the real-time magic.
Created with: .**Net Core, VueJs, C#, TypeScript, SCSS**

Heron.gr, CMS and Loyalty system ⊡
Participated in the development of a significant CMS site, seamlessly integrating loyalty systems and promotional campaigns. The project catered to one of the largest electricity providers in Greece, enhancing their digital presence and customer engagement.
Created With: .**Net Framework, Umbraco, SCSS, JQuery**

🎓 EDUCATION

Computer Science, Harvard University
2023 December – present
Used edX.org, an online learning platform, to take courses offered by accredited universities and training programs to acquire skills in **C** and **Python** while learning basic computer science concepts.

Software Developer, PeopleCert
2019 October – 2020 April | Athens, Greece
Grade: Outstanding Excellence Award
Completed 500 hours of intensive training, including individual assignments and team projects. Proficient in .NET, C#, JavaScript, jQuery, Bootstrap, HTML, React, Angular, and more.

Economic and Regional Development, Panteion University of Social and Political Sciences ⊡
2014 September – 2018 September
Athens, Greece
Grade: 8.7 Excellence Award
Applied Economics and Management
Econometrics & Quantitative Economics
Regional & Local Development Planning
